

Lisa's Natural Path Consent Form

- Naturopathic Doctor's (ND's) are not medical doctors (MD's).
- I understand that I should continue to see any medical doctors I am currently under the care of, and that any prescription medication should not be altered without first consulting your doctor who recommended it.
- ND's are trained specialists who use non-invasive natural medicine, such as vitamins, minerals, herbs, and dietary changes to create a healthy environment in the body.
- Your visit today is based on the belief that the body has a natural ability to heal itself, if given an appropriate internal and external healing environment.
- Nothing said, done, typed, printed, or reproduced by us is intended to diagnose, prescribe, treat, or take the place of a licensed physician.
- Signs of physical, mental, supplemental deficiencies or dietary stressors may be identified today. Information about traditional uses of supplementation that may create a healthy balance in the body may be discussed. This is not intended to be interpreted as a substitute for a licensed physician's treatment.
- I am not on this visit or subsequent visit acting as an agent for the federal, state, county, local agencies, or news media on a mission of entrapment or investigation.

I have read and discussed the above information and agree with it completely.
